Grid Fundamentals
155 N 400 W, Salt Lake City, Utah 84103

2020 Classes
Grid Fundamentals provides a holistic overview of the electric grid—focusing on the basics of electricity, transmission lines, generation equipment, system configuration, grid operations, and power distribution. Participants will also review regulations for reliability, issues that affect the environment, and current events.

This class is ideal for anyone new to the electric utility business, environmentalists, policymakers, legal professionals, managers, and supervisors.

WECC offers group discounts. Learn more by contacting WECC Meetings.
