

VLRAG – Variability in Loads and Resources Advisory Group

Webinar

11:00 a.m.—12:30 p.m., Friday, July 23, 2021

This meeting will recur every other Friday through August 20, 2021.

The VLRAG is studying the impact of variability in loads and resources on the western interconnection. This study will focus on additional battery energy storage systems needed to reliably serve the load if there is loss of a certain percentage of renewable generation.
