

Internal Controls Practices Group

Webinar

2:00 p.m.—4:00 p.m., Tuesday, August 31, 2021

An effective controls program can make stakeholder operations more efficient, ensure the reliability and security of the Bulk Power System, and help meet overall compliance objectives. Join WECC's Internal Controls Practices Group and PacifiCorp (PAC) in a virtual event to guide participants through PAC's CIP-004 Access Management Program, exploring its structure, design, and strategies. This is an opportunity for open discussion; ask questions and share information with your industry peers.

PAC is the largest grid operator in the western United States, serving two million customers in Oregon, Washington, California, Utah, Idaho, and Wyoming.
