

## **DEMSWG – Data and Energy Management System Work Group**

**Virtual**

**9:00 a.m.—12:30 p.m. Mountain Time, Friday, May 20, 2022**

The DEMSWG identifies and prioritizes EMS-related problems and encourages common solutions focusing on system reliability and operations. It supports the data needs of the RC function, and other entities within the Western Interconnection and oversees methods to ease the exchange of real-time, modeling, and other operational data. At this meeting, the group will discuss plans and status of the current users of the ECN/WON for implementing the CIP-012-1 encryption solution, review and updating their charter and review of key documents associated with the ECN/WON.
