

EMTTF – Electromagnetic Modeling Transients Task Force

Virtual

9:00 a.m.–11:00 a.m. Mountain Time, Tuesday, June 21, 2022

The EMTTF (Electromagnetic Modeling Transients Task Force) has been established to research and document the tools, data, and techniques associated with the performance of electromagnetic transients modeling activities. Activities will include documentation of which tools are available for modeling of electromagnetic transients and preparation of presentations detailing these tools and their data requirements.
