

# Hydro Capacity Issues

August 10, 2022

Jon Jensen, WECC

# Hydro

---

- Weekly/monthly hydro helped
- Mica 3 planned to be shutdown from 2032-Mar-01 to 2032-Dec-01 for generation upgrade
- Grand Coulee - 4 units of the 24 are off by 100-200 mw
- May have to do with seasonal ratings for units
- Some aggregations sum out to the same capacity
- Unpopulated retirement dates
