Learning Opportunities

This in-person course is hosted in two unique half-day sessions, offering a comprehensive explanation of how the electric power system works, how it is managed, and why. We will review the technology, operation, and markets of a modern reliable power grid. We will also discuss environmental issues and regulations that affect the electric power system.

Class Topics

- Fundamentals of Electricity and the Interconnected System
- Generation, Transmission, and Equipment
- System Operations

- Regulations
- Policy, Environment, & Current Events

Who Should Attend?

- Anyone new to the electric utility business
- Environmentalists
- Policymakers
- Legal personnel
- Managers/supervisors/executives
- Anyone who is looking for a broader view of the grid
