ADS Strategic Review Observations

- No one mentioned to stop ADS initiative; intent of ADS is good
- Scope and vision for ADS needs clarity: communication gap exists as to value of ADS for some stakeholders
 - Concept/confusion of common starting point
- Role of regional planning groups in ADS creation is unclear
- ADS validation should be timely
- Quality control issues with ADS data
- Produce a near-term ADS (3/5 year, etc.)

Observations (Cont.)

- Consideration of future resources (inconsistency between PCM and power-flow community)
- Limitations of existing PCM tools
 - Round-trip not working
 - Adequate analysis capabilities
