Was generation data loaded for the unit/group?

Yes: Certificates are issued based on the total whole number of MWhs loaded for each vintage. Any fractional MWh will be rolled forward until sufficient generation is accumulated for the creation of a certificate.

No: Contact the QRE to have the missing generation loaded as an adjustment.

Were the certificates off by a fraction of a certificate?

Yes: Contact the QRE to have the generation re-reported as an adjustment and advise that they may need to work with WREGIS on any outstanding data requests.

No: Contact the WREGIS Helpdesk for further assistance.

Was the generation fail WREGIS feasibility?

Yes: Did fuel-split information accurately entered?

Yes: Contact the QRE to have the generation re-reported as an adjustment and enter the fuel-split information in a timely manner. If fuel-split information was already entered (incorrectly), contact WREGIS Helpdesk for further assistance.

No: Contact the WREGIS Helpdesk for further assistance.

No: Did the prior-period adjustment reduce the number of certificates that should have been issued for the prior period?

Yes:

Because certificates cannot be un-created, a downward adjustment is subtracted from a future Certificate vintage following the approval/waiting period of the adjustment. All subsequent vintages will be affected, until the total subtracted equals the downward adjustment.

No: Was fuel-split information accurately entered?

Yes: Did the prior-period adjustment reduce the number of certificates that should have been issued for the prior period?

No: Was a prior-period adjustment loaded for the unit/group since the generation month?

Yes: Did fuel-split information accurately entered?

Yes: Contact the QRE to have the generation re-reported as an adjustment and enter the fuel-split information in a timely manner. If fuel-split information was already entered (incorrectly), contact WREGIS Helpdesk for further assistance.

No: Contact the WREGIS Helpdesk for further assistance.

No: Is it a multi-fuel unit?

Yes: Contact the QRE to have the generation re-reported as an adjustment and advise that they may need to work with WREGIS on any outstanding data requests.

No: Contact the WREGIS Helpdesk for further assistance.

Was the prior-period adjustment loaded within the current vintage’s 90-day cycle?

Yes: Did the prior-period adjustment reduce the number of certificates that should have been issued for the prior period?

No: Contact the QRE to have the generation re-reported as an adjustment and advise that they may need to work with WREGIS on any outstanding data requests.

No: Contact the WREGIS Helpdesk for further assistance.
