

2022 RRC Goals Review

October 20, 2022

Vic Howell

Director, Reliability Risk Management

2022 Goals

- To become established as a new committee—to make sure the members of the RRC understand why the committee exists, to clarify responsibilities and expectations, and to generate excitement and enrollment;
- To successfully transition from the Operating Committee (OC) and the Market Interface Committee (MIC) to the RRC;
- To develop a three-year work plan that supports the 2022 Risk Priorities, RRC objectives, and WECC's overall reliability and security objectives;
- To support the JGC restructure and implement the RRC structure in collaboration with the JGC and RAC; and
- To develop and implement a risk intake process to help identify, prioritize, and address reliability and security risks.
