

EEA Advisory Group Update

October 18, 2021

Tim Reynolds

Mgr., Event Analysis and
Situation Awareness

Background

- WECC August 2020 Heatwave Report
 - Create an EEA best practices document for RCs and BAs
- Creation of Advisory Group
 - Request for participation send to all RCs, BAs, and RSGs
 - High level focus
 - Share challenges and successes
 - Identify and document best practices
 - Bonus – Create a reference sheet
 - First meeting was June 10, 2021

Example of Topics and Questions

- Best practices (ex., tools or processes) that are used to prevent or handle EEAs
- When is load shed required?
- How long is it acceptable to be in an EEA?
- Insight and clarity to the EEA levels in EOP-011 Appendix A
- Lessons learned from other events

Current Actions and Next Steps

- Finalizing draft document for approval
 - Review being done by team members and WECC Compliance SMEs
 - Goal for WECC final approval in November 2021
- Will provide industry outreach on the document
- Interest to keep the document up to date
