WECC-0140 Reliability Standards Development Procedures Update for 2020 Posting 1 for Comment

On July 8, 2020, the WECC-0140 Reliability Standards Development Procedures Update for 2020 Drafting Team (DT) agreed by majority vote to post Posting 1 for a 30-day comment period.

Comments can be submitted by selecting the Submit and Review Comments accordion on the [WECC-0140 Home Page](#). Then, click on Submit Responses to Posting 1.

Per the WECC Reliability Standards Development Procedures (Procedures) supported by the WECC Standards Committee (WSC) Charter, the WSC is charged with oversight and maintenance of the Procedures. This project meets the cyclical review requirement and specifically seeks to: 1) incorporate WECC Guideline – Responses to Comments Received During Ballot, 2) incorporate WECC Guideline – Drafting Team Assignments, and 3) update the document template. This project generally reviews all aspects of the Procedures to enhance readability.

The posting period will open August 12, 2020, and close September 12, 2020.

For ease of navigation, documents are located on the Posting 1 for Comment accordion and may be sorted by date using the “modified” column header.
