

Request for Comments Draft Reliability Guideline: Recommended Approaches for UFLS Program Design with Increasing Penetrations of DERs

The NERC System Planning Impacts of DER Working Group (SPIDERWG) is currently conducting a triennial review of the Reliability Guideline on UFLS Program Design in the context of increasing Distributed Energy Resource (DER) penetration. The NERC Reliability and Security Technical Committee (RSTC) has authorized the guideline to be posted for a public comment period lasting 45 days, from March 17, 2025, to May 1, 2025. Additionally, a survey has been created to assess the guideline's effectiveness.

As part of this review, once you complete the effectiveness survey, you will receive a link to the comment matrix, where you can submit any feedback, you have about the guideline.

Draft Reliability Guideline:

Recommended Approaches for UFLS Program Design with Increasing Penetrations of DERs

Effectiveness Survey
