WECC Monthly Webinar Series

WECC hosts three monthly reliabilty focused webinars tailored to the unique operational and compliance needs of stakeholders across the Western Interconnection. Whether you are a grid engineer looking for deep-dive technical modeling or a compliance professional tracking regulatory updates, these interactive engagement sessions deliver critical data and regional insights necessary to maintain grid stability and security. Explore the tracks below to view upcoming schedules, join the live events, or stream past recordings.

	Reliability in the West WECC	Technical Insights in the West WECC	Reliability & Security Oversight Update WECC
Purpose and Focus	**High-level** perspective on current risks, staying up-to-date, and navigating the evolving grid.	**Deep-dive** discussions on complex technical challenges affecting the reliability of the grid.	**Reliability and security oversight** engagement for addressing topics and questions relevant to the region.
Level of Detail	Broad overview; intentionally avoids technical engineering topics.	Detailed, technical presentations, complex subject matter, wide variety of topics	Operational and regulatory focus; addresses specific standards questions and reliability beyond compliance.
Target Audience	**Stakeholders** needing wide-ranging perspective on the grid; policymakers, decision-makers, states and provinces.	**Regional technical leaders**, data scientists, and engineering subject matter experts.	**Compliance Monitoring and Enforcement Program (CMEP) stakeholders** in the Western Interconnection.
Cadence	**First Wednesday** of each month, 11:00 a.m.–12:00 p.m. MT	**Third Wednesday** of each month, 2:00–3:00 p.m. MT	**Third Thursday** of each month 2:00–3:00 p.m. MT
