

Dynamic Model Acceptance Tests

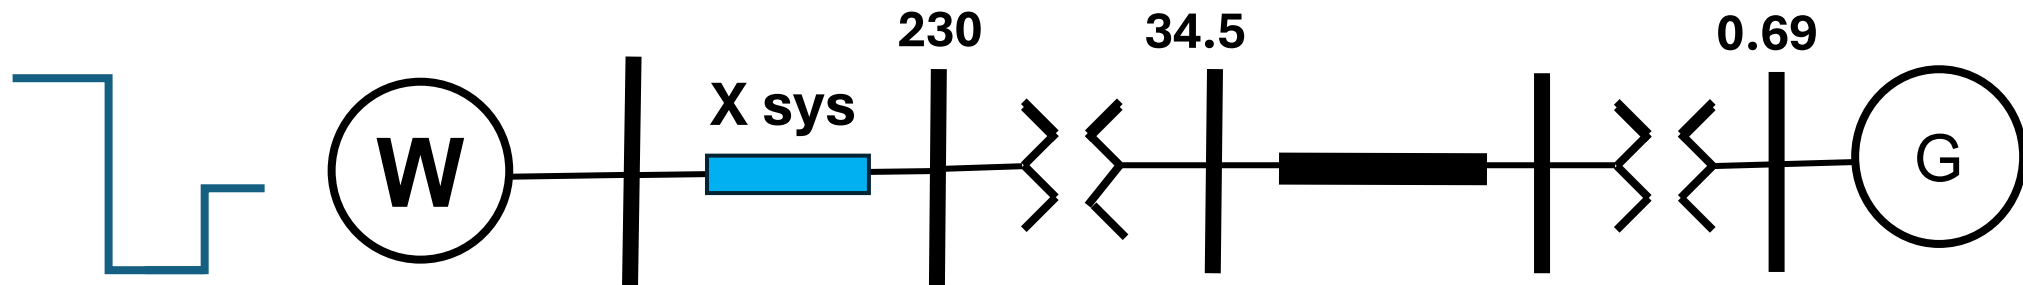

WECC Modeling Validation Subcommittee

January 25, 2024

Dynamic Model Acceptance Tests

- Our goal is to validate models provided by project developers before the models are used in Generation Interconnection cluster studies
- We use a play-in function to inject disturbances at plant POI

Q1: What is the acceptable range of “system impedances” (or POI SCRs) to be simulated in model acceptance tests

Dynamic Model Acceptance Tests

Q2: How to set-up hybrid plants for model acceptance tests?
