

Electric Reliability and Security for the West

Appendix C

Base Case Naming Convention

In this document, the designation of A, B, or C at the end of a case identified indicates revisions made to case data because of comments received during the review process or to create a case to represent a given scenario based on the base case. The numerical designation near the end of the case identifier is used to distinguish between different base cases, which were compiled for the same season with different load and generation patterns.
