Grid Fundamentals Course:

[Register Here](#)

This course is hosted in two sequential sessions, offering a comprehensive explanation of how the electric power system works, how it is managed, and why. We will review the technology, operation, and markets of a modern reliable power grid. Environmental issues and regulations that affect the electric power system will also be discussed.

Course Topics:

Day One

- Introduction to WECC
- Electricity Basics
- The Interconnected Power System

Day Two

- System Operations
- Regulation
- Environment

Who Should Attend?

- Anyone new to the electric utility business
- Environmentalists
- Policymakers
- Legal personnel
- Managers/supervisors/executives
- Anyone who is looking for a broader view of the grid
