WECC Enforcement Fundamentals training prepares Registered Entity staff to resolve noncompliance with Reliability Standards. Attendees of the training will learn about the Enforcement process, including how to find and use industry guidance to prepare a noncompliance report. We will cover the enforcement “magnificent seven,” which is critical to reporting and resolving all noncompliance with reliability standards. All instructors are experienced enforcement staff who understand the noncompliance review process and can answer all your questions.

Register today, as space is limited.
