

Program Certificate Exception Request Form

WREGIS

September 2023

Certificate Exception Request Type:

- ☒ **Retroactive Certificate Creation:** Creating WREGIS certificates for a period that falls outside the standard certificate creation rules.
- ☐ **Retroactive Eligibility Code Application:** Applying eligibility codes to previously created certificates.
- ☐ **Other:** Requesting an exception to WREGIS certificate creation policy not specified above.

Certificate Exception Request Details:

Program Name: Nevada RPS

Program Year(s): 2023

Provide a brief explanation of why you are requesting the certificate exception.

In Oct-2021, Eagle Shadow Mountain (ESM) submitted a copy of an interconnection agreement with NV Energy (NVE) as proof of COD for 325 MK 8ME. The agreement states that the facility may interconnect and deliver energy to the grid. The facility was being completed in phases and was not, in fact COD. NVE notified WREGIS of facility COD in May-2023 (actual COD), in conflict with the COD previously provided by ESM. Because a facility cannot have two CODs, WREGIS determined that phases added after the original COD could be reported as an additional generating unit. The additional unit went COD in May-2023 but was not registered in WREGIS until Dec-2023. The months of May-Aug. of 2023 fall outside the WECC/WREGIS Section 5.3 Registering Rules, requiring a unit to be registered within 90 days of COD. The NV Pec Admin is requesting a waiver of this rule as the certificates are slated to be used in complying with the NV RPS. Denying NVE the certificates affects its ability to meet its RPS obligations and could result in NVE being assessed penalties and/or NVE not receiving credits its ratepayers paid for.

WREGIS customer(s): Arevon - NV Energy (Offtaker)

WREGIS ORG ID: 325MK 8ME LLC

Generating unit(s): W17341

Fuel type(s): Solar Electric

Vintage(s): May through Aug of 2023
