## **5. WREGIS Staff—Updates**

J. Brander stated:

- The remainders issue continues to be a top priority for WREGIS. Most of the work has been completed. If a customer previously received an email stating they still have outstanding generators, WREGIS will contact them individually once their full portfolio is addressed.
- There is additional work being done in parallel with the remainders issue efforts, with a release scheduled for next week that includes e-Tag bug fixes, minor UI updates, and back-end technical improvements to increase efficiencies and reduce processing errors.
- Following the launch last month, Thermal-Cogen customers have submitted generation and have received RECs.
- Discussions regarding hourly data reporting will resume in the next few weeks and information will be sent out to members soon.
