# To Do List

---

- SPPC Load—Agreement on any adjustments
- NW topology changes (received)
  - Submit as PF base case modification
- Updated alignments from PNNL/PGE
- Redistribute unmapped units based on unaligned PF units
  - Updated placement Tool

# To Do List

---

- DG-BTM
  - Updating to year 2018 by creating Area Level DG-BTM based on the 2032 ADS PCM County Level data
- Netted units in PF (identified by submitter)
  - Distribute by area
- Aggregations
- Sync PF case with PCM changes: supply and transmission changes
  - To create the ADS Base Case (2034HS1a\_ADS)

# To Do?

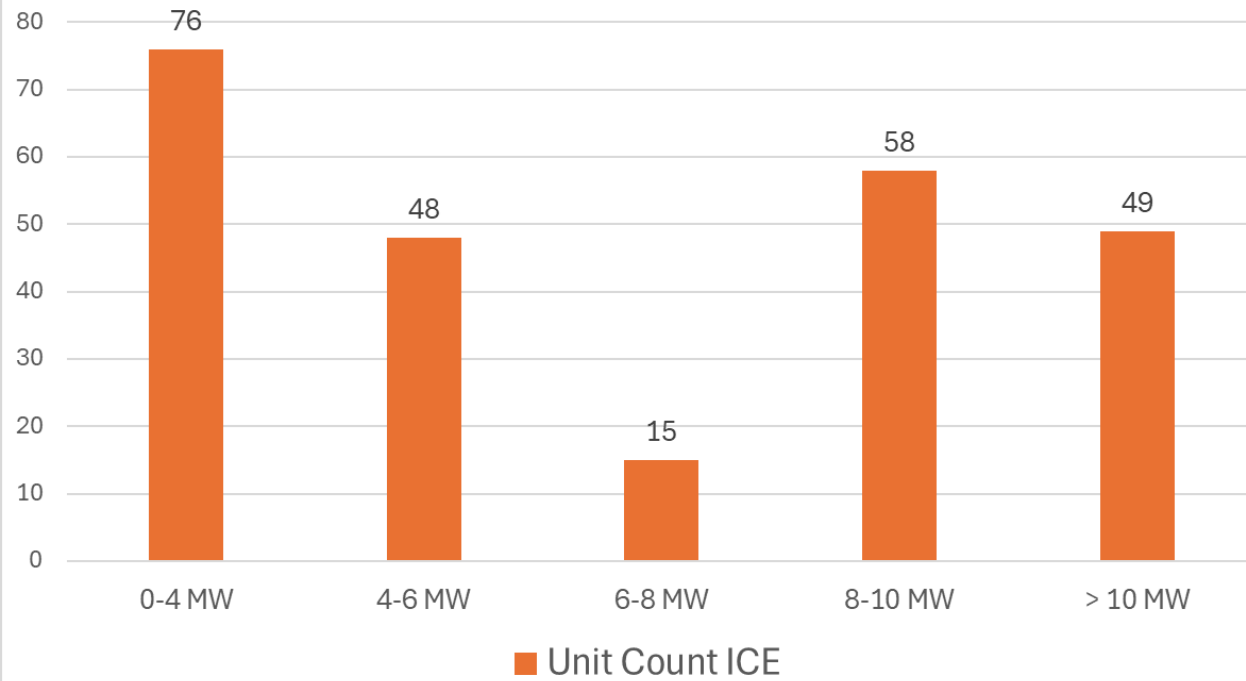

- Proposal:
  - Leave as L&R max (winter/summer) for this release. Discuss how to proceed
- Apply Capacity Rule? – PCM Max doesn't exceed PF (VAR Margin Ratio)
  - Check whether more than 5% (MW change) change, need to review. Review list of units that seem out of sync.
  - Optional change case to align capacities with PF summer rating?

# Aggregations

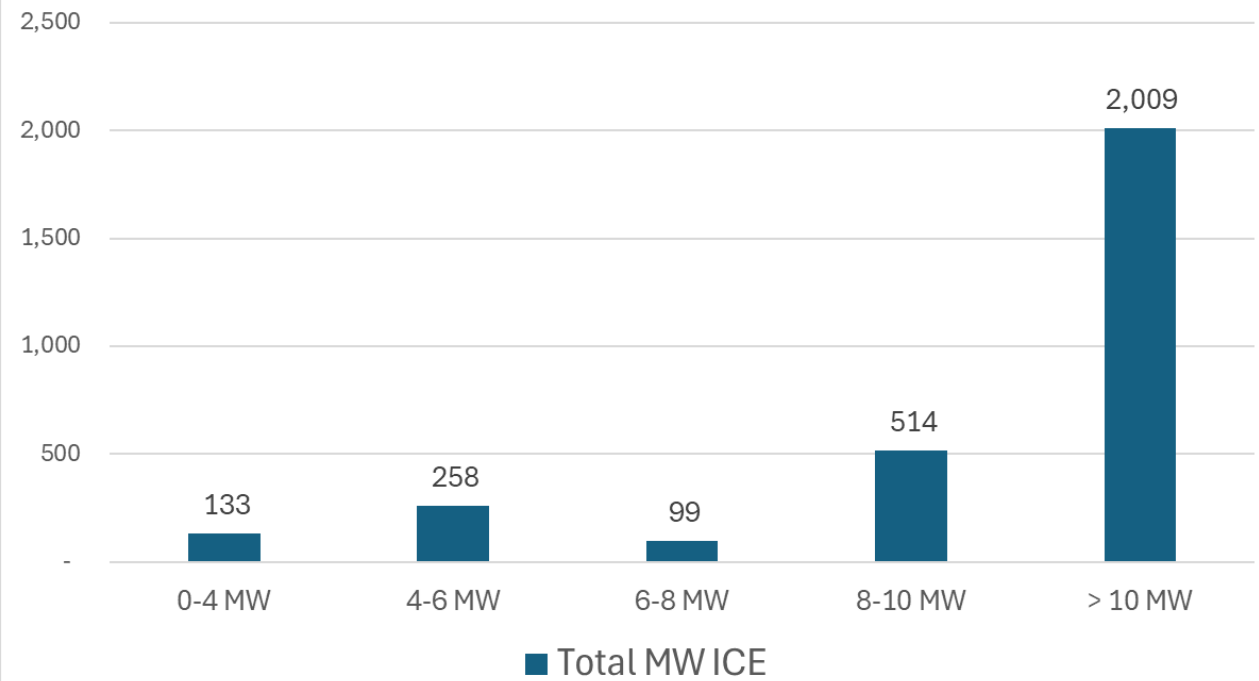

- Proposed Aggregations:
  - ICs
    - Aggregate small units (same plant)
  - Hydro
    - Aggregate plants
  - Energy Storage
    - Aggregate same facilities within reason
- Additional DevStatus's—Proposal
  - NA—Not Applicable
  - Agg—Disabled
  - CL—Cancelled

# ICE

Unit Count ICE

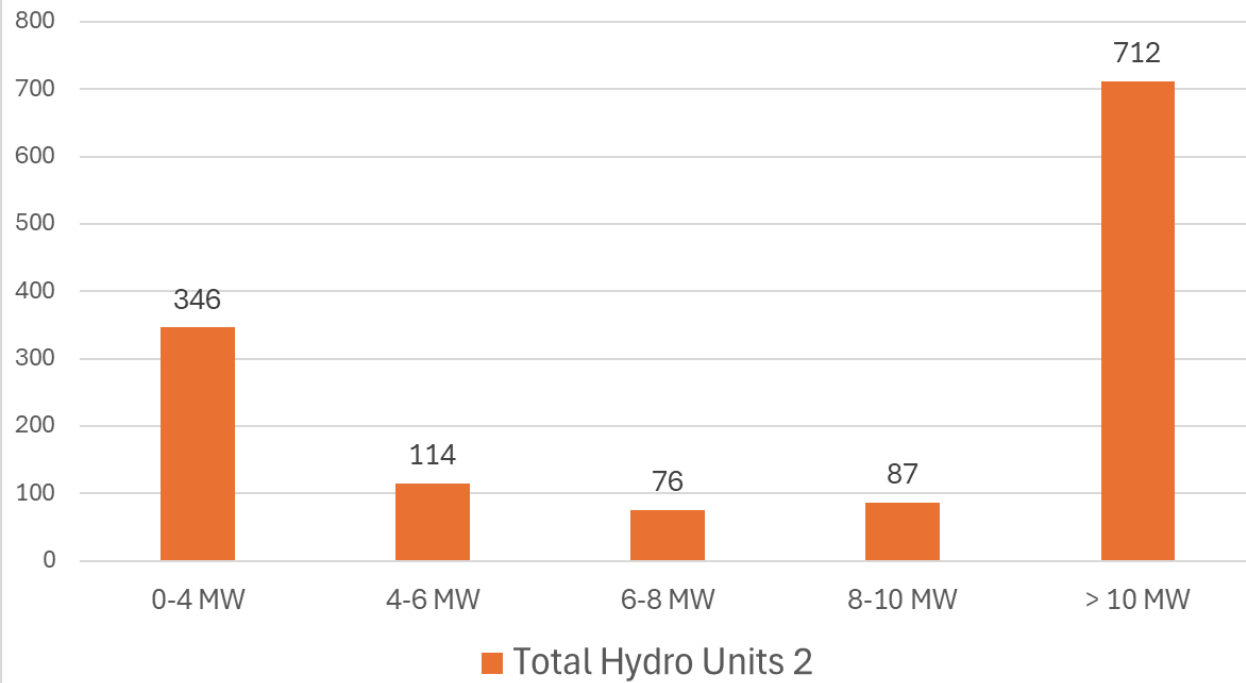

Total MW ICE

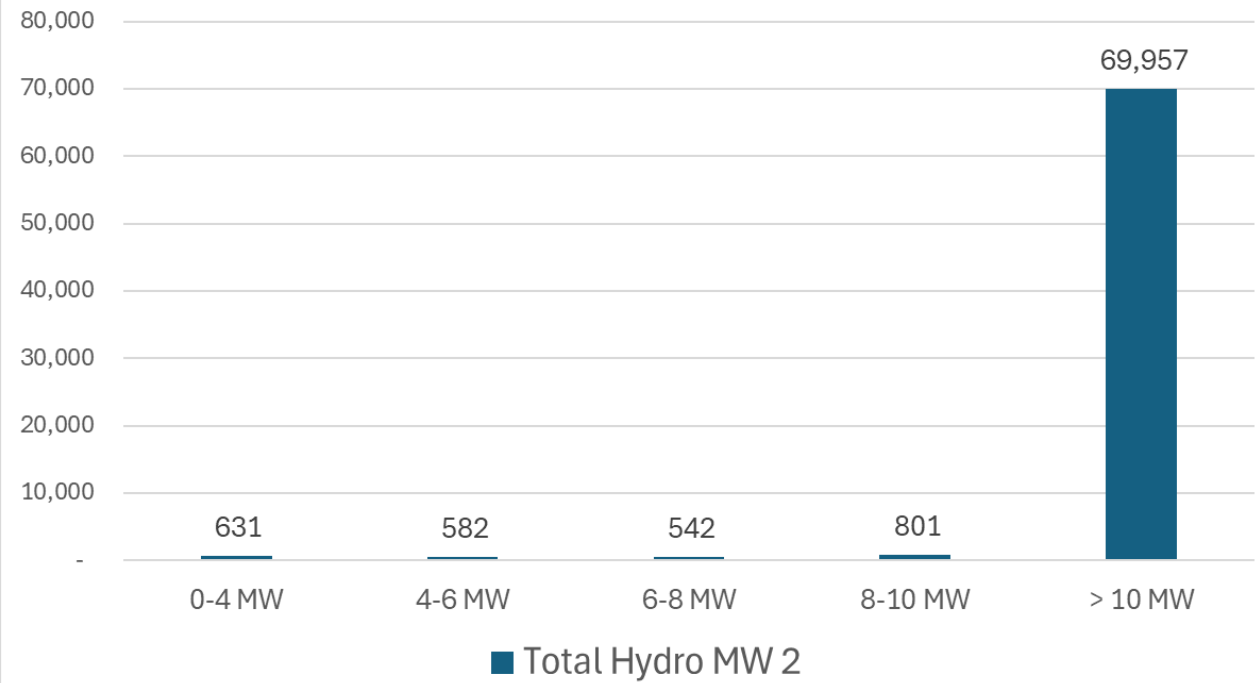

# Hydro

Total Hydro Unit Count

Total Hydro MW
