

Data Preparation Manual Change Request

System Review Subcommittee
Guidance for 20-Year Data Creation

Change Summary

The purpose of this DPM change request is to add details to help data submitters understand the expectations specifically for the Year 20 cases that are being requested.

Schedule

- Incorporate language into DPM: For inclusion in 2026 DPM.
- Adherence to revised DPM language: Same as 2026 DPM.

Detailed Description

Please see the attached DPM revised by the Long-term Transmission Planning Task Force (LTPTF); there is a minimal addition in the body of the document and the addition of Appendix 4.

Benefits

The main benefit is additional clarity concerning the expectation for the data submitters in coordinating and providing the information needed for the Year 20 base case.

Cost

The change to the DPM should not create any additional costs beyond the need to build a Year 20 base case.

Alternatives

No alternatives from the proposed change exist for representing Balancing Authorities (BA) in planning cases.

Proposed Edits

Please see the redlined version of the DPM with Appendix 4 included.
