WECC Reliability & Security Workshop

March 25–26, 2025

Join us for the Reliability & Security Workshop in Tempe, Arizona, or virtually in Whova. Our workshops support Registered Entity compliance programs with robust, relevant content promoting the reliability and security of the Western Interconnection.

This workshop will focus on programmatic guidance for NERC Compliance Monitoring and Enforcement Programs (CMEP), outline WECC priorities, discuss industry best practices, and share valuable insights from the Western Interconnection. Participants will leave equipped to develop and enhance their NERC compliance program.

REGISTER

This workshop is ideal for compliance program generalists, people who are new to the industry or in compliance roles, Primary Compliance Contacts and alternates, and anyone interested in learning more about how to develop and improve their CMEP.
