

**Reliability & Security  
Workshop**

**WECC**

**March 17–18, 2026  
San Diego, California**

# Internal Controls 101

**Molly Elliott**

*Senior Technical Analyst, Oversight Planning*

**Electric Reliability  
& Security for the West**

March 18, 2026

# WECC Perspective on Internal Control and Risk

# What is Internal Control?

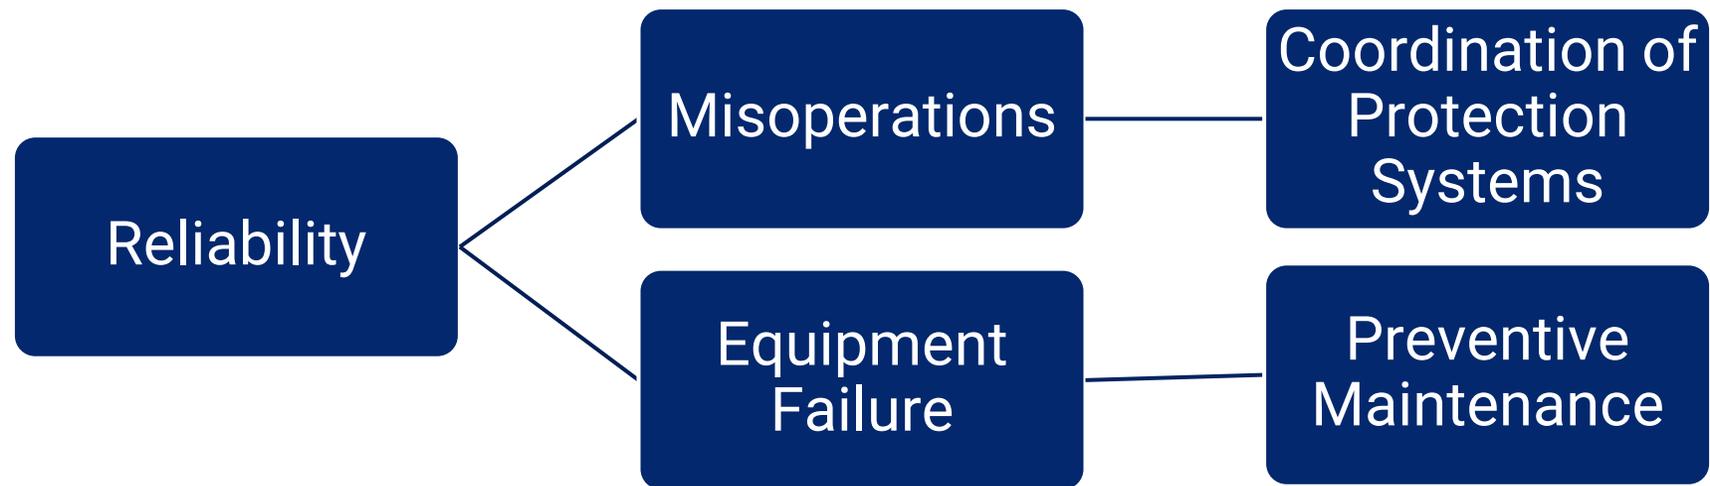

**Objective**

**Risk**

**Controls**

# Internal Controls Framework – Simplified

## Control Environment

Culture of Compliance  
Thoughtful governance and oversight model  
Clear separation of responsibilities and accountability

## Risk Assessment

Ability to document YOUR specific risk to the BES  
Ability to document YOUR specific operational and security risk  
Thoughtful program to abate risk and measure efficacy

## Control Activities

Match controls to risks (compliance vs. operations vs. security)  
Controls have clarity of purpose (preventative vs. detective)  
Controls and process are one and the same

## Information & Communication

Holistic internal communication (training, awareness, coordination, projects, etc.)  
Holistic external communication (Coordination with other entities, WECC, vendors, etc.)  
Information is good and current

## Monitoring Activities

Internal monitoring and/or audits  
Good investigations for when things go wrong  
Document failures AND near-misses through to completion of risk mitigation

# Control Environment

---

Commitment to integrity and ethical values

Oversight of the entity's internal control system

Establish an organizational structure, assign responsibility, and delegate authority to achieve the entity's objectives

Commitment to recruit, develop, and retain competent individuals

Evaluate performance and hold individuals accountable for their internal control responsibilities

# Control Environment

# Control Environment

---

## Where to start

- Get to know the business
- Use your position to improve communication between business units
- Focus on nurturing a corporate culture that focuses on the things that matter – hiring, training, communication

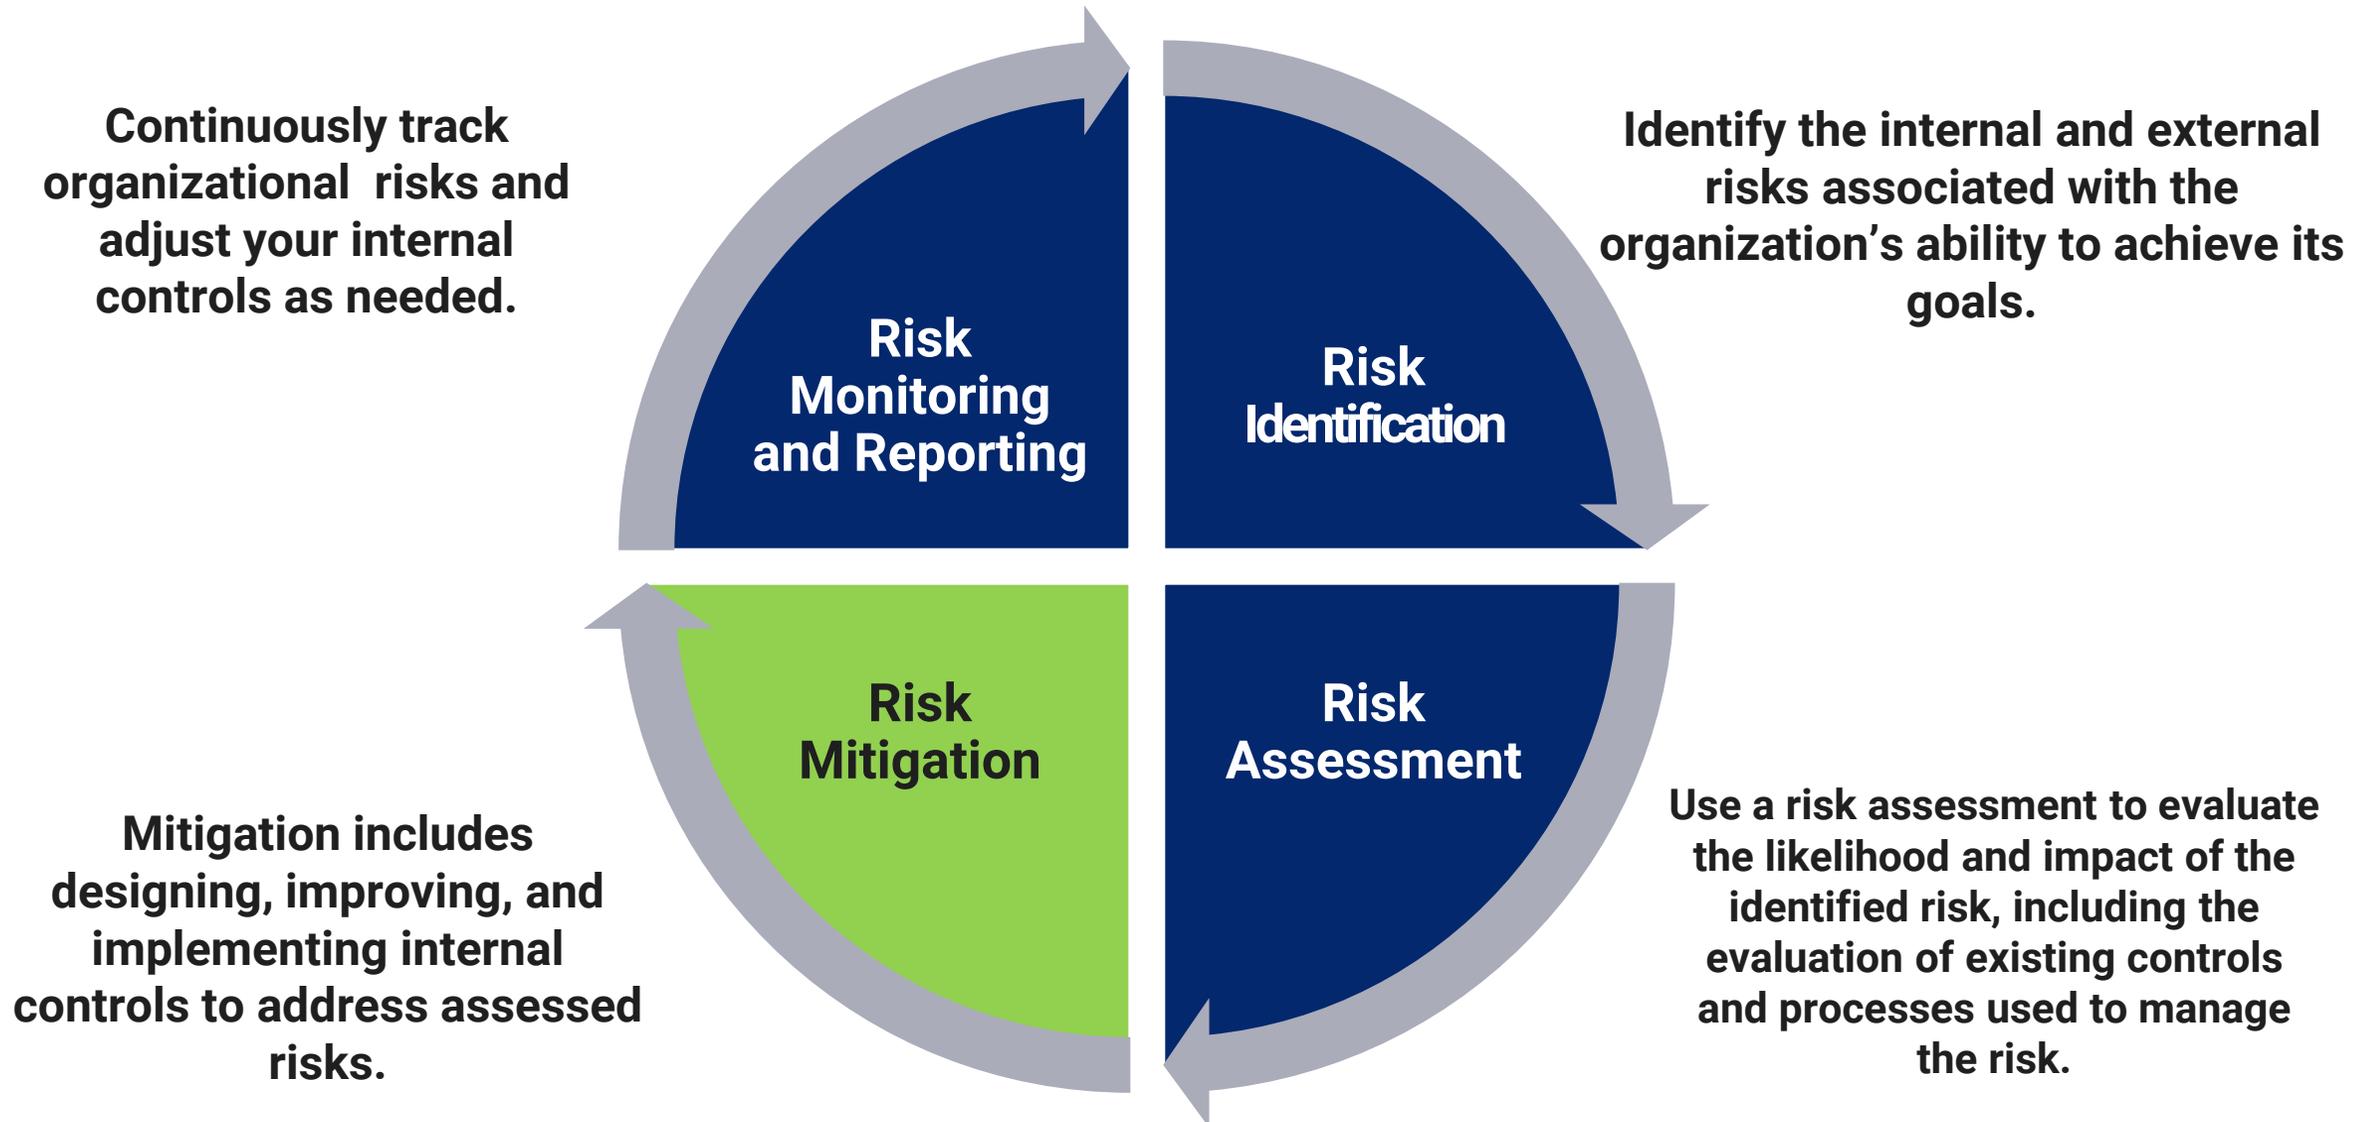

## Where to aim

- Add measurement that feeds into improvement programs
- Revise structures and add tools to foster learning between departments and break down silos
- Track improvement efforts

**What could have kept you from getting to this workshop today?**

# Risk Assessment

# Risk Assessment

---

## Where to start

- Enterprise Risk Management (If you have it)
- ERO Enterprise resources
- Other industry resources

## Where to aim

- Risk register
- Objectives are defined in measurable terms
- Understanding of the system and awareness of impact on the system (e.g., Aggregate Risk)
- Risk monitoring and continuous improvement (triggered, periodic, ongoing)

# Risk Assessment

---

Identified Risk	Likelihood	Impact	Mitigation	Owner

Version 1.1

# Control Activities

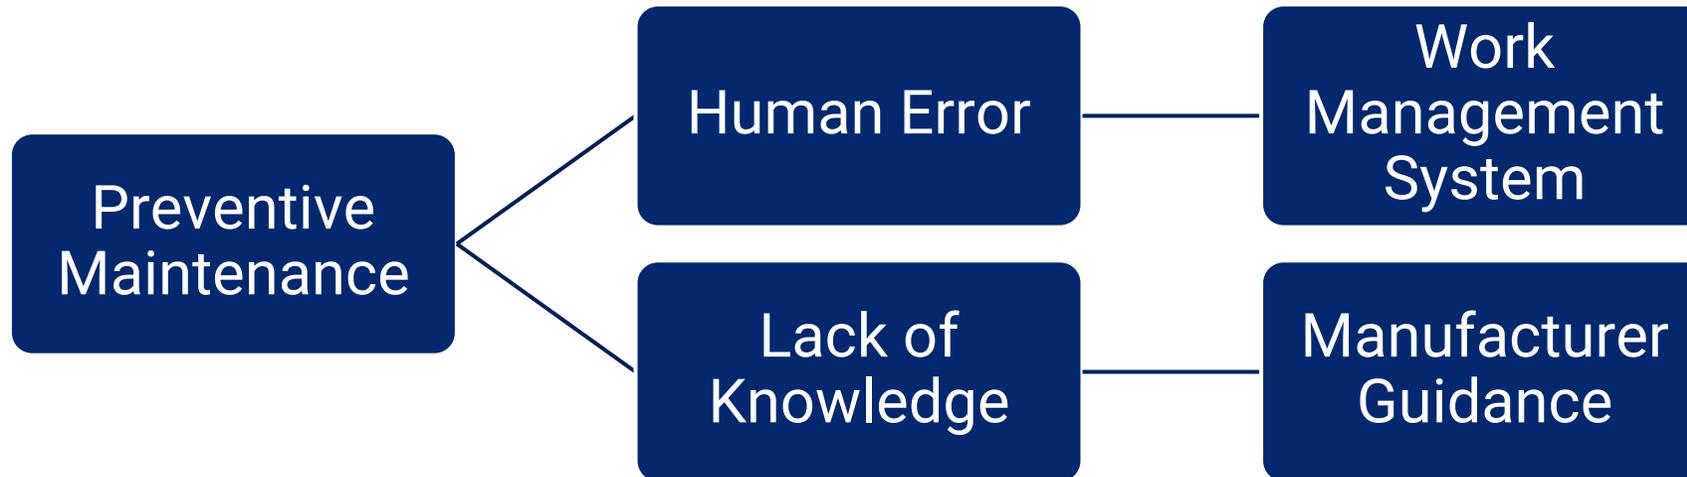

**Control Objective**

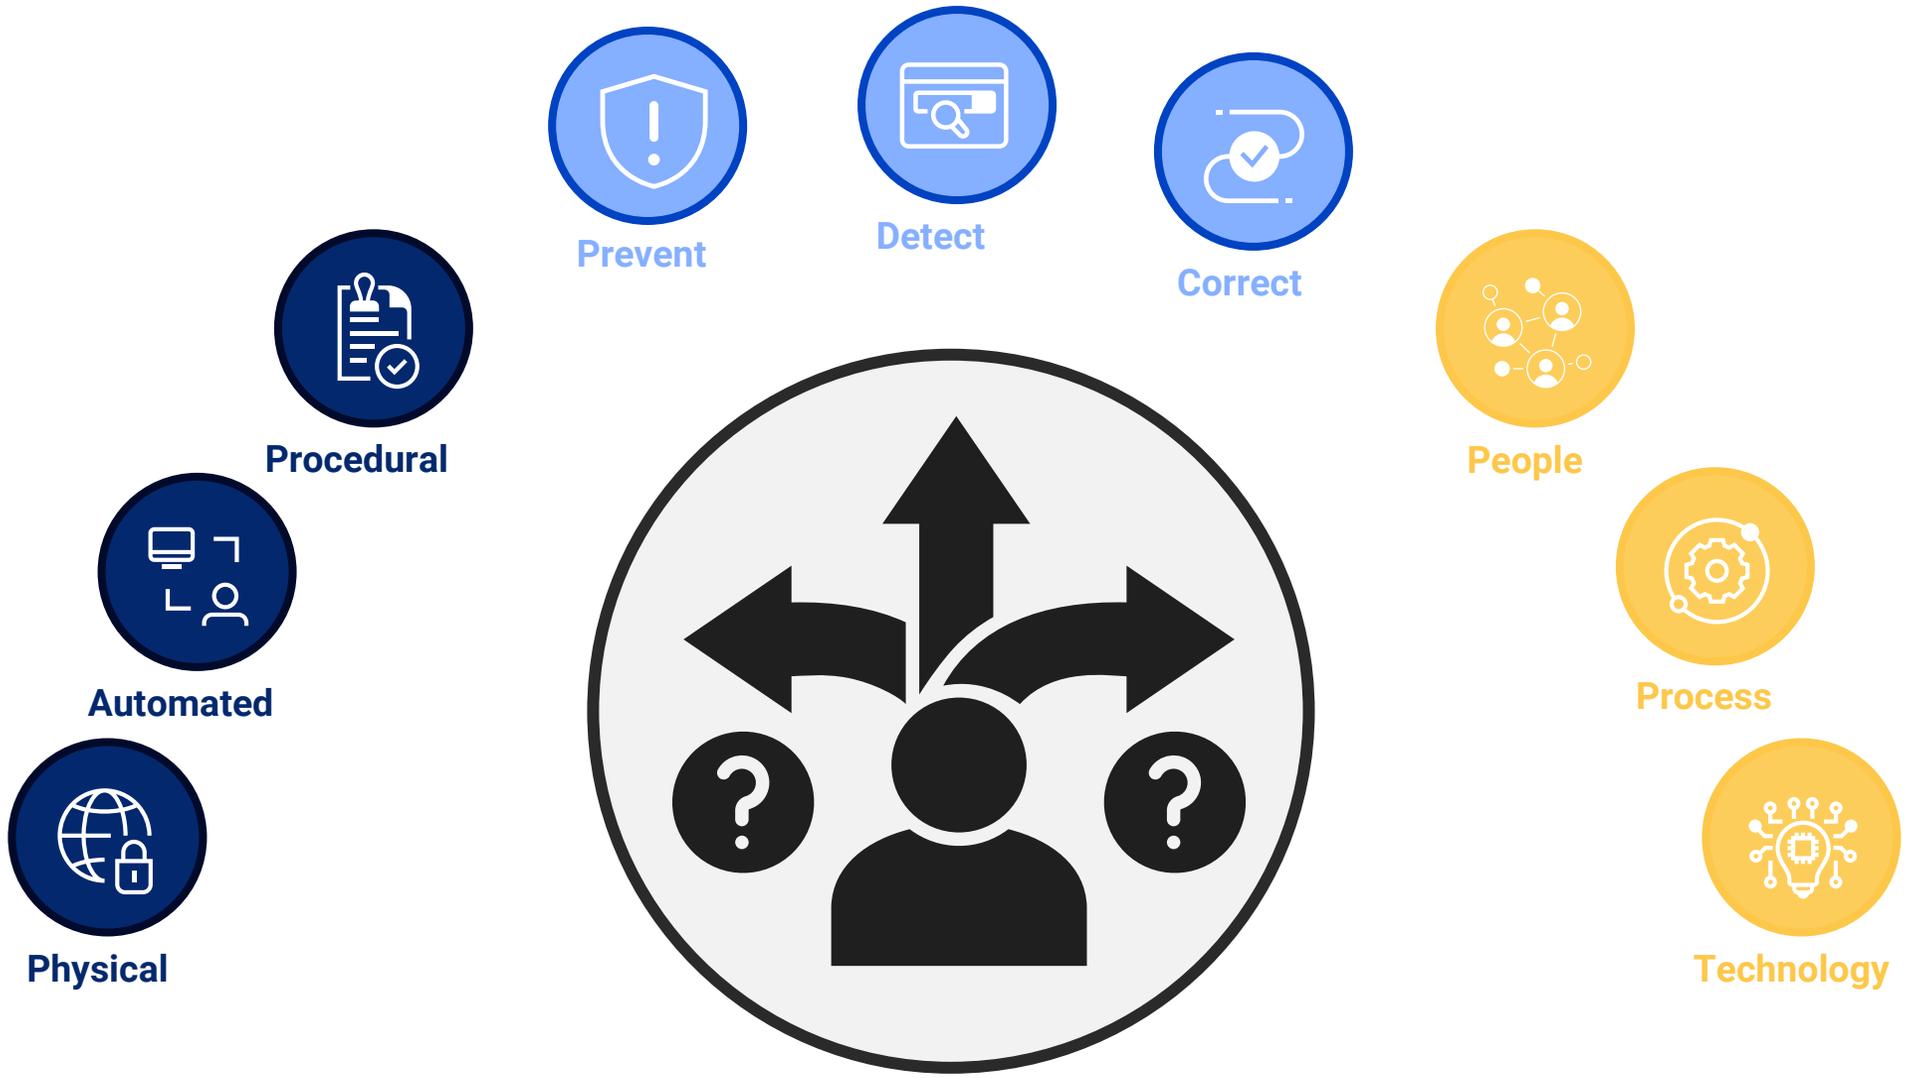

**Risk**

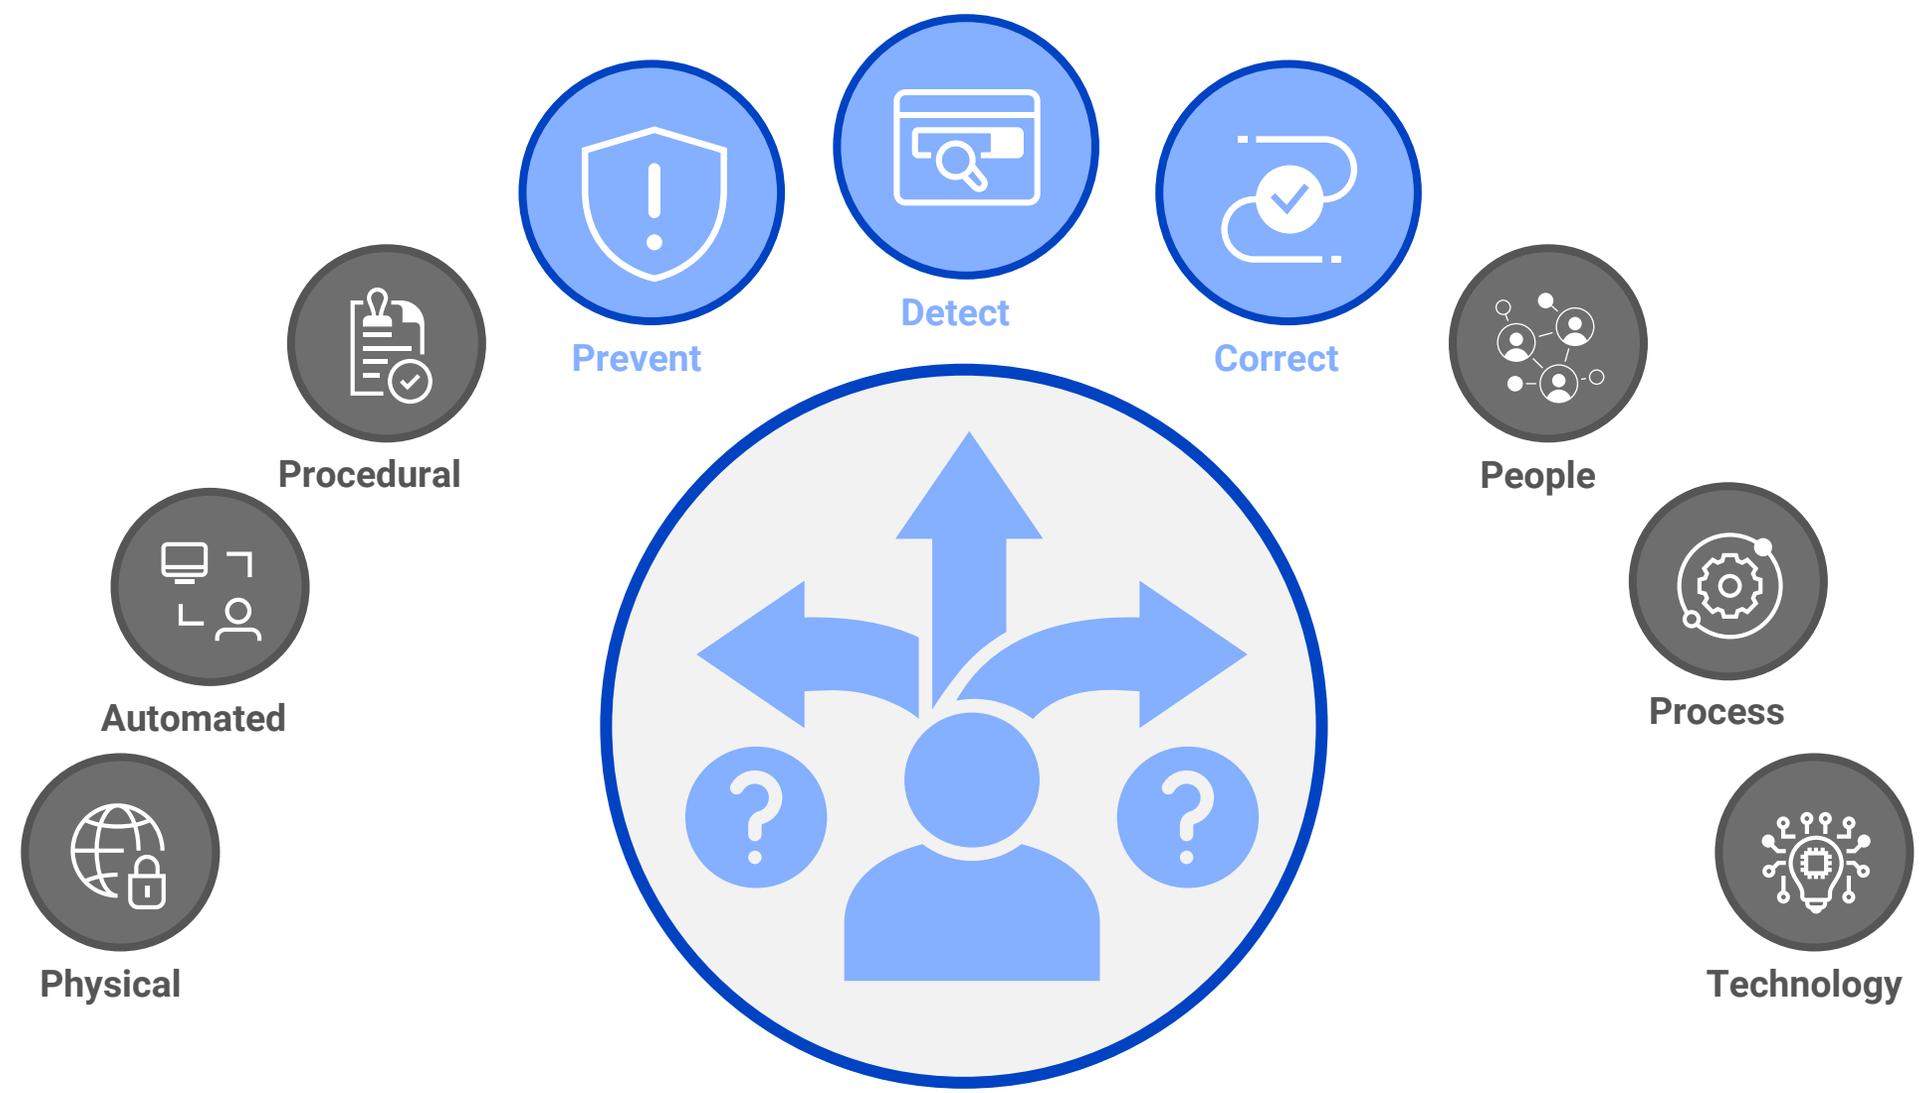

**Control Activity**

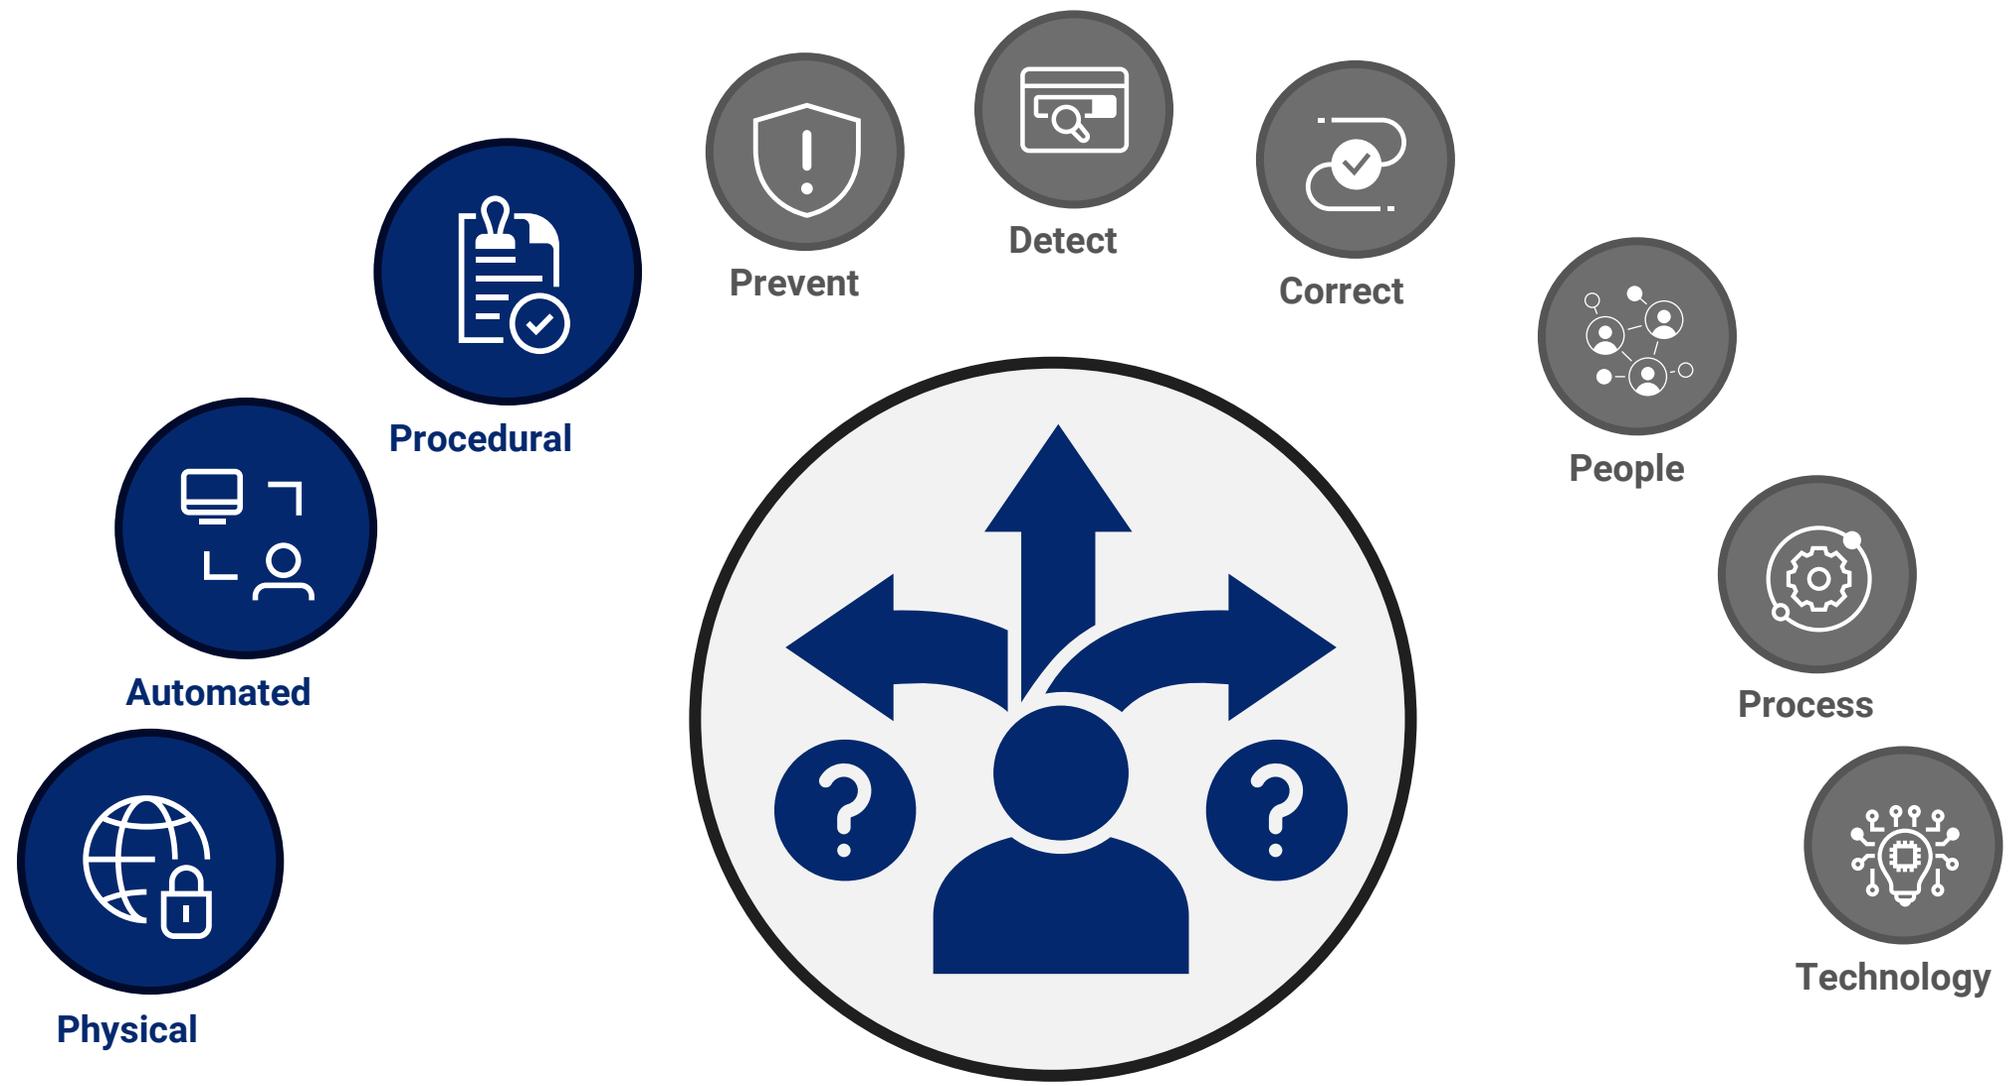

# Control Activities

# Control Activities

# Selecting Controls

# Selecting Controls

## What kind of control is this?

# Objective: Prevent Intrusion by Bad Actor

## Fence

- Prevent
- Physical
- Technology

## Security Guard

- Prevent or Detect or Correct
- Procedural
- People

## Sign-in Sheet

- Prevent or Deter or Detect
- Procedural
- Process

# Procedural Controls

---

## Procedures mitigate a risk: Lack of Knowledge

- Inconsistency
- Absences
- Turnover

## Benefits

- Inexpensive and easy to implement
- Track process changes and exceptions
- Support processes that are performed infrequently

# Procedural Controls – What’s Missing?

## Pignoli

### Ingredients

- 2 cans almond paste
- 2 egg whites
- 1 cup sugar
- powdered sugar
- egg white
- pine nuts

### Directions

- Bake at 350 for 15 minutes

# What is missing in this recipe?

# Procedural Controls – What's Missing?

---

Purpose: How many cookies am I making?

Incomplete information/Tribal knowledge:

- What size is the can of almond paste?
- Which brand?

Step by Step instructions:

- Blend the almond paste, sugar, and egg whites in a double boiler
- Remove from heat and cool
- Knead on board sprinkled with powdered sugar
- 3<sup>rd</sup> egg white is brushed on the cookie before rolling in pine nuts
- Refrigerate before shaping
- Bake on parchment paper

# Layering Controls

---

- Procedural controls alone:
  - Easy to circumvent
  - Susceptible to human error
  - May not produce enough evidence to monitor the process

# Common Control Activities

	Prevent	Detect	Correct
People	Training, communication, coordination	Peer review, manager review, performance review	Disciplinary actions, remedial training
Process	Segregation of duties, action plans, checklists, triggers, identification/scoping, change authorization	Spot checks, internal audits, inventory counts, field walkthroughs	Business continuity plans, updated policies & procedures, corrective action plans
Technology	Access controls, firewalls, fence, Locks	Alarms, alerts, reconciliations, data integrity checks, monitoring	Patching, backups

# Information and Communication

- At the organizational level
  - Reporting to decision-makers
  - Understanding of corporate goals
  - External communication
- At the process level
  - Training
  - Information flow between business units
  - Process coordination with relevant stakeholders
- Support corporate objectives and continuous improvement

## Look For Indicators

- Frequency of errors/events
- High level of rework
- Length of time it takes to find issue
- Repeated root cause
- Performance vs. others

## Periodic Assessment

- Have the risks changed?
- Are the risks sufficiently mitigated?

# Monitoring

---

Documented

Effectiveness – not just  
implementation

Feed improvement  
processes

# Moving to the Next Level of Maturity

---

Be Proactive

Be Intentional

Use Lessons From  
Others

**Controls Guidance and Compliance Failure Points**  
PRC-002-5  
February 2026

**Disturbance Monitoring and Reporting Requirements**  
Asset System Identification  
Long-term Studies/Assessments  
System Protection

**WECC Intent**

The *Controls Guidance and Compliance Failure Points* document is intended to provide a starting point for registered entities in assessing risks associated with their business activities and designing appropriate internal controls in response. It contains examples supporting registered entities' efforts to design controls specific to operational risk and compliance with the North American Electric Reliability Corporation (NERC) Reliability Standards. WECC does not intend for this document to establish a standard or baseline for entity risk assessment or control objectives.

*Note: Guidance questions help an entity understand and document controls. Any responses, including lack of affirmative feedback, will have no consequences on an entity's demonstration of compliance during a Compliance Monitoring and Enforcement Program (CMEP) engagement.*

*\* Please send feedback to [internalcontrols@WECC.org](mailto:internalcontrols@WECC.org) with suggestions on controls guidance and potential failure points questions.*

**Definitions**

**Control Objective:** The aim or purpose of specified controls; control objectives address the risks related to achieving an entity's larger objectives.

**Control Activities:** The policies, procedures, techniques, and mechanisms that enforce management's directives to achieve the entity's objectives and address related risks.

**Internal Control:** The processes, practices, policies or procedures, system applications and technology tools, and skilled human capital that an entity employs to address risks associated with the reliable operation of its business. Internal control components include:

- Control environment
- Risk assessment
- Control activities
- Information and communication
- Monitoring
