

WREGIS User Testing Interest Form

April 27, 2026

WREGIS is looking for user testers who can provide early feedback on the new WREGIS software. Testers will be placed into a pool and called upon to test specific features based on their experience, interest, and WREGIS organization type. We hope this will increase stakeholder confidence in platform design and help identify potential issues or opportunities for improvement leading up to the software launch.

The following criteria will be applied when selecting users for testing:

- User must be an active WREGIS user with a login to one or more organizations.
- User must sign a non-disclosure agreement.
- User must have system expertise or experience relevant to the functions being tested.

Contact Information

Name:

Title:
