

Getting Ready for Align

WECC launched Align for compliance monitoring and enforcement in the U.S. in May 2021. Here are the steps you should take to be ready:

1. Register for an ERO Portal Account

Entities manage access to Align and the SEL through the ERO Portal. If you don't already have an account, [create one today](#). If you have an account already, verify you can log in and that your credentials are up to date.

2. Request Access to Align in the ERO Portal

Access to Align is managed by your entity administrator within the ERO Portal. Log in to the portal and select **My Applications** to verify your access and submit a request for your administrator to change access if needed. Entity administrators will be notified to review and approve pending application requests within the ERO Portal. Contact the [NERC Help Desk](#) for support.

3. Verify Contact Information

Entities in the U.S. maintain contact roles and information in the ERO Portal/CORES. During the transition, contact information for entities in other jurisdictions will be maintained separately in webCDMS and CORES/ERO Portal. Ensure your entity's Primary Compliance Contact information is current and roles are correctly identified in both platforms. This will help ensure you receive important notifications and information.

4. Contact align@wecc.org with Questions

WECC has established align@wecc.org as a dedicated contact point for questions and feedback about Align and the SEL.
