WREGIS Acknowledgement of Station Service

Updated September 2022

Acknowledgment of WREGIS Certificate Defined Fuel/Technology Categories and Station Service Ineligibility

In conjunction with my registration of a generating unit with the Western Renewable Energy Generation Information System (WREGIS), I acknowledge the [WREGIS Operating Rules](#) provide that WREGIS certificates will only be issued for defined fuel/technology categories in WREGIS and that no WREGIS certificate will be issued for station service associated with a generating unit registered with WREGIS, regardless of the source of such station service.

I acknowledge the [May 2012 Program Administrator Advice Letter](#) to WREGIS Regarding Station Service and that it is applicable to the creation of WREGIS certificates.

I acknowledge I have had an opportunity to ask WREGIS staff questions concerning the fuel/technology categories or the consideration of station service for WREGIS certificates which are or will be used in my WREGIS organization(s).
