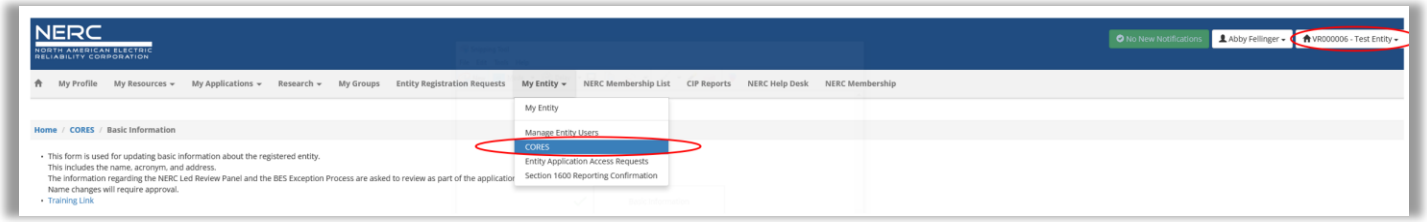
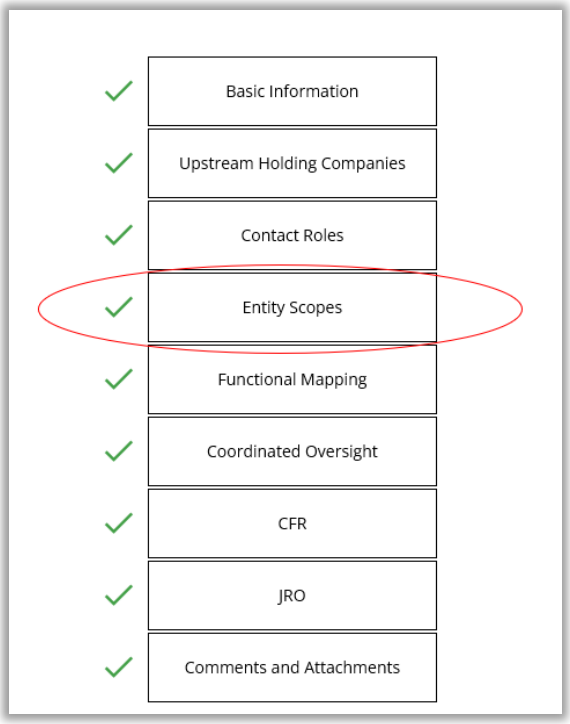
Activating Category 2 GO GOP Functions in CORES

Please follow the instructions below to submit a request to add a Category 2 Generator Owner and/or a Generator Operator Scope (Function) in the Centralized Registration ERO System (CORES).

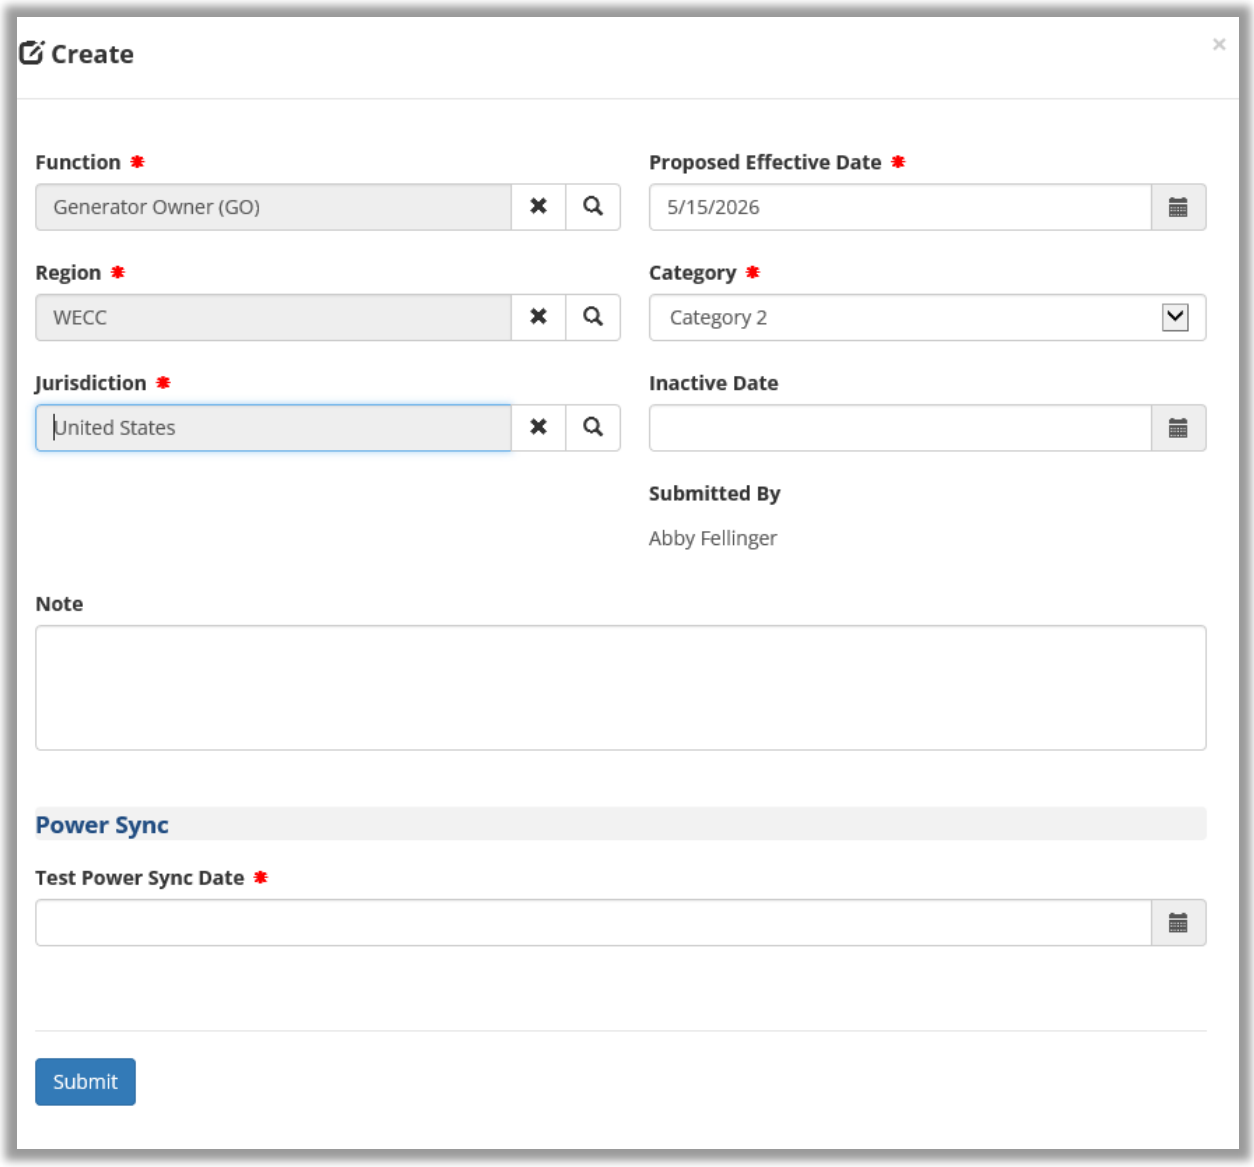
- Log into the ERO Portal
- Select the applicable entity from the dropdown box located at the top right side of your menu options
- Select My Entity -> CORES



- Select the **Entity Scopes** section



- To "Activate" a Category 2 Generator Owner and/or Generator Operator Scope (Function), select the **Add Scope** option and fill out all required fields.
    - Enter the applicable required fields: **Function**, **Proposed Effective Date**, **Region**, **Category, Jurisdiction**, and **Test Power Sync Date**
    - Include a **Note** that explains the reason for the registration change request
    - Select the **Submit** button



Additional Information:

- In accordance with phase 3 of the Inverter-Based Resources (IBR) Registration Initiative the Proposed Effective Date should be 5/15/2026 if the Category 2 asset is operational on or before 5/15/2026.
- Please enter the initial **Test Power Sync Date** related to your first operational Category 2 generation asset.
- If you are activating the Category 2 Generator Owner and Generator Operator Scopes, repeat the process above to add the other Scope/Function.

- Select the Functional Mapping section and enter the applicable relationships:
