Doug, Tom, and STS Members:

TPWR does not have new generation projects (200 MW or greater) or any new, re-design, permanent removal, or upgraded transmission facilities over 200 kV. In addition, there are no planned facilities or other changes (e.g., operating procedures) below these thresholds that may have a significant impact on the reliability of the WECC interconnected bulk electric system.

Please let me know if you have any questions.
