Studies Subcommittee Members (STS), Eepsita and Doug,

Colorado Springs Utilities (CSU) does not have any new generation (200 MW or greater) that has executed an LGIA or new, redesigned, or permanently removed transmission facilities over 200 kV that have not already been granted a waiver of “Significant Impact” status . Additionally, there are no planned facilities or changes (e.g., operating procedures) below these thresholds that may significantly affect the reliability of the WECC interconnected electric system.
