Doug, Tom and Studies Subcommittee Members (STS),

Metropolitan Water District of Southern California does not have any new generation projects (200 MW or greater) or any new, re-design, permanent removal or upgraded transmission facility over 200 kV. In addition, there are no planned facilities, or other changes (e.g., operating procedures) below these thresholds that may have a significant impact on the reliability of the WECC interconnected electric system.

Regards,  
Nayeem Mohammad Abdullah,  
Principal Resource Specialist,  
Power Operations and Planning,  
Metropolitan Water District of Southern California
