WECC-0157: PRC-006-5 Automatic Underfrequency Load Shedding, Update to the WECC Regional Variance – Posting for Comment

On September 24, 2025, the WECC-0157 Drafting Team voted to post the project’s redline update for a 30-day comment period. While the comment period is open, comments can be submitted by selecting the “Submit and Review Comments” accordion on the [WECC-0157 project page](#) and then clicking the “Submit Comments” button.

The comment period is now open and will close November 1, 2025, at 6 p.m. Mountain time.

All Documents relevant to posting 1, including the unofficial comment form that has the questions being asked, can be found under the “Posting 1 for Comment” accordion on the project page.

The Drafting Team will reconvene in November to address comments received.

Thank you for your participation in the Standards Development Process at WECC
