<Limited-Disclosure>

WECC-0157: PRC-006-5 Automatic Underfrequency Load Shedding, Update to the WECC Regional Variance – Posting for Comment 2 – Implementation Plan

On May 1, 2026, the WECC-0157 Drafting Team met to draft the Implementation Plan for the project's update to the Regional Variance of PRC-006-5. At that meeting, the DT voted to post the project's Implementation Plan for a 30-day comment period.

While the comment period is open, comments can be submitted by selecting the "Submit and Review Comments" accordion on the [WECC-0157 project page](#) and then clicking the "[Submit Comments](#)" button.

The comment period is now open and will close June 4, 2026, at 6 p.m. MDT.

The Drafting Team is asking for responses to the Question

1. **Do you support the Implementation Plan language that has been drafted for the update to the WECC Variance of the NERC Standard PRC-006-5?** (Yes/No with a narrative explanation)

All Documents relevant to Posting 2, including the unofficial comment form that has the question being asked, can be found under the "Posting 2 for Comment" accordion on the project page.

The Drafting Team will reconvene on June 5, 2026 to address comments received.

Thank you for your participation in the Standards Development Process at WECC
